SEPTEMBER TOUR
CHEVRON CANADA – BURNABY REFINERY

The Chevron Refinery has been located on Burnaby's North Shore since 1935. The refinery has a throughput of 55,000 BPD. The facility is fed conventional and synthetic (oil sands) crude via a buried pipeline from Alberta. There is approximately 300,000 cubic meters of storage in approximately 45 tanks. The refinery produces high octane gasoline, jet fuel, diesel, and fuel oil. Chevron has invested over \$200 million since 1986 in refinery environmental and efficiency improvements. Additional information is available at www.chevron.ca.

This event will feature a tour of the refinery and related facilities. The tour will take place on Wednesday, September 08, 2004. Space is limited so an RSVP (see below) is required to attend.

Date: Wednesday, September 08, 2004

Tour: Chevron Canada – Burnaby Refinery

Location: 5201 Penzance Drive (Refinery – Area 2 on Map)
Burnaby, BC

Agenda: All participants must arrive at the refinery gate by 5:15pm.

For those wanting to participate in the tour, please RSVP to Farmand at farmand.ghafari@city.burnaby.bc.ca or 604-294-7161 by noon on Tuesday, September 07, 2004.

UPCOMING EVENTS
